Filling Guide:

1. Fill the tank with your cannabis oil. Gently put the syringe between the airway and the outer wall of the oil tank and fill the tank with oil at a proper speed.

▲ Do not allow oil to enter the center airway!

▲ Do not top off the tank with oil.

▲ While filling oil, avoid dropping oil onto the shell to prevent chemical reactions. If so, please wipe it off immediately.

2. Press on the mouthpiece within 3 minute after filling! We highly recommend to use capping machine to press on the mouthpiece.

▲ Failure to insert the mouthpiece immediately after filling may cause leakage.

▲ Cap the product with a hand punch or a professional capping machine.
