➢ To switch the flavor, move the slide switch to either the left or right position for a single flavor; move the slide switch to the middle position to vape both two flavors at the same time

4. Filling Guide

1. Fill the tank with your cannabis oil.

Gently put the syringe into one of the tanks (between the airway and the outer wall of the oil tank) and fill the tank with oil at a proper speed, then fill the other one.

▲ *Do not allow oil to enter the center airway!*

▲ *Do not top off the tank with oil.*

▲ *While filling oil, avoid dropping oil onto the shell to prevent chemical reactions. If so, please wipe it off immediately.*

2. Press on the mouthpiece immediately after filling!

▲ *Failure to insert the mouthpiece immediately after filling may cause leakage.*

▲ *We highly recommend using a capping machine or hand punch to press the mouthpiece.*

6. Storage

1. The storage temperature is 23±5℃ and the humidity is 50±10% RH.

2. Place in a cool, dark and ventilated place.

3. Keep the disposable sealed storage and avoid direct sunlight.

7. Notification

1. Press the mouthpiece into tank within 1 minute after filling.

2. Please fully charge the device before use.

3. Please keep the product out of the reach of children after use.

4. We highly recommend keeping your products upside down during transportation (with the mouthpiece facing down) to avoid oil leakage.
