How to Use

➢ To turn on/off the device, click on the button 5 times rapidly. The indicator light will stay on for 2 seconds to indicate it is on and flash 1 time for powering off. Once it is on, it's ready for use.

➢ To activate the Preheat Mode, click on the button 2 times rapidly. The indicator light will keep flashing and runs at a low voltage of 1.8V. Preheat mode will last for 15 seconds.

Pod Cartridge Oil Filling Instructions

1. Fill the tank with your favorite oil.

Gently put the syringe between the airway and the outer wall of the cartridge and fill the cartridge with oil at a proper speed.

2. Immediately cap the cartridge after filling, press-fit the mouthpiece with a special jig.

Notes
▲ *Do not inject the oil into the airway!*
▲ *Do not top off the tank with oil.*
▲ *We highly recommend to use capping machine or hand punch to press the mouthpiece.*

Storage

1. The storage temperature is 23±5℃ and the humidity is 50±10% RH.

2. Place in a cool, dark and ventilated place.

3. Keep the pod sealed storage and avoid direct sunlight.

4. The storage period should not be too long, so as not to exceed the shelf life of oil.

Notes

1. Pay attention to the shelf life of filled oil.

2. **2.** Handle the aluminum alloy housing with care. Do not crush, throw, or twist the housing.
