KUSHCART

Output Voltage	2.37V
Storage Temperature	23±5℃
Working Temperature	-10℃～+50℃
Timeout Protection	Flash Red 6 Times
Short Circuit Protection	Flash Red 3 Times
Low Voltage Protection	Flash Red 10 Times
Overload Protection	Flash Red 3 Times

How to Use

- To activate the Preheat Mode, click on the button 3 times rapidly. LED indicator will breathe up and down in white light during the Preheat Mode. User can press one time to end the preheat mode.

Filling Guide

1. Fill the tank with your cannabis oil.

Gently put the syringe between the airway and the outer wall of the oil tank and fill the tank with oil at a proper speed.

- *Do not top off the tank with oil.*
- *While filling oil, avoid dropping oil onto the shell to prevent chemical reactions. If so, please wipe it off immediately.*

2. Press on the mouthpiece immediately after filling!

- *Failure to insert the mouthpiece immediately after filling may cause leakage.*
- *We highly recommend using a capping machine or hand punch to press the mouthpiece.*

Storage

1. The storage temperature is 23±5℃ and the humidity is 50±10% RH.

2. Place in a cool, dark and ventilated place.

3. Keep the disposable sealed storage and avoid direct sunlight.

4. The storage period should not be too long, so as not to exceed the shelf life of oil.

Notification

1. Pay attention to the shelf life of filled oil.

2. Handle the product with care. Do not throw, or twist the product.
